- **How do Sentry Mapping and Chronicle work together, and why is this partnership special?**

  Sentry Mapping makes detailed maps of your cemetery using drones and GPR (ground-penetrating radar) surveys. Chronicle then hosts these maps and links them with your cemetery records. This means you get an accurate, interactive map that shows who is buried where.

- **Can I use both Chronicle and Sentry Mapping separately, or do I need both?**

  Sentry Mapping provides a high-quality PDF map of your cemetery that can be easily printed or viewed. With Chronicle, your maps come to life in an interactive digital format, included for free as part of the service. This integration offers greater flexibility and control over how you access and manage your cemetery data.

- **What happens to your Chronicle Viewer access after two years?**

  After two years, the Chronicle Viewer free period ends and you will be asked to pay a small extra cost of $10 per month for every 2,000 plots. If you want more benefits from our extensive features, like editing records or tracking plot sales, you can upgrade to Chronicle Pro, giving you full control over your records and map.

- **Can I upgrade to Chronicle Pro later?**

  Yes, you can upgrade to Chronicle Pro anytime. Pro gives you full control. It's a complete solution to manage both your cemetery's map and records.

You are selected to enjoy this partnership benefits.
